FOR YOUR MAINTENANCE TEAM

Your machine is down. The answer already exists.

In the manual, in last year's service report, in a colleague's head. Transaction-Network brings it all together for every machine in your plant, whoever built it.

Nine manufacturers, one account.

One factory. Machines from many manufacturers. In one account.

Already in the network: UNITED GRINDING · Studer · Walter · Blohm · Jung · Mägerle · United Machining Solutions · Schubert · Zollern · Kaltenbach · Singulus · Bihler · AP&S · pssbl. Robotics · Paoluzzo and many more.

THE PROBLEM

One plant, many manufacturers, and a different route for each.

A separate portal for every manufacturer.

Separate logins, separate hotlines, separate shops. Every fault starts the search from scratch.

Knowledge sits with a few people.

One colleague knows last time's fix. When they're out or leave, the team starts from zero again.

Finding the right part is manual work.

Which part fits which serial number? You search the catalog and order by email or phone.

WHEN A MACHINE STOPS

Three steps from downtime to the right part.

YOU SEE IT RIGHT AWAY.

Every machine, every manufacturer, one view: faults, maintenance due, open orders.

→

YOU KNOW WHY.

The Service Brain knows your manuals and your history and answers with the source.

→

YOU ORDER FROM THE MANUFACTURER.

The right part at the manufacturer's price, without a chain of phone calls.

WHAT YOU GET

Back in production sooner. With less effort.

A faster fix.

The answer comes from your documents with its source, and you order the part directly from the manufacturer. No more chains of phone calls.

One account instead of many portals.

Every machine, every manufacturer, one login. Machine records, maintenance, tickets and ordering are free, for as many users as you like.

Knowledge stays in the plant.

What your people learn during a repair stays with the machine. The Service Brain finds it again next time.

WHAT'S INCLUDED

Everything about the machine in one place.

ADD THESE ONLY WHEN YOU NEED THEM.

Service Brain, Visibility, Parts Inventory

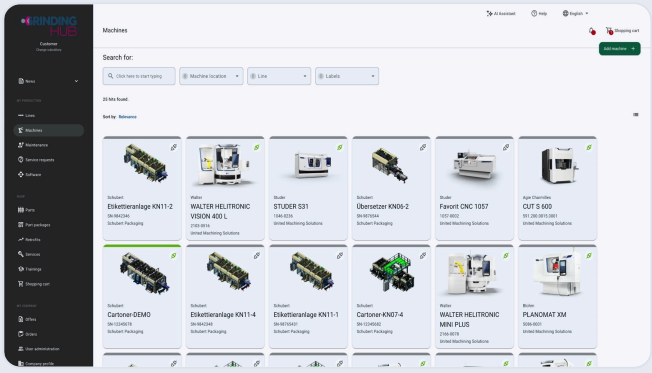

- AI that answers from your manufacturers' documents.
- You know what's on the shelf.
- You see the status live.

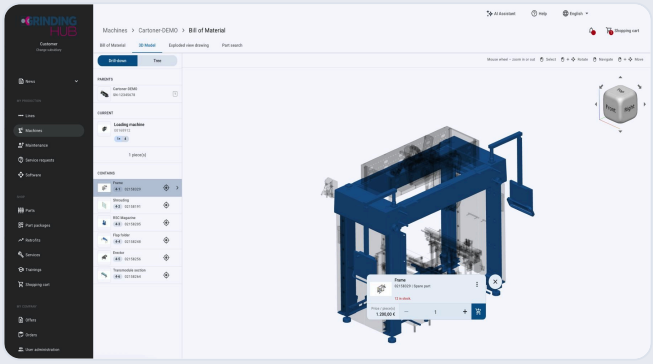

+

THESE ARE INCLUDED FREE.

Machine Fleet, Maintenance, Service Requests & Shop

- Every document for the machine at hand.
- The manufacturer is part of the process.
- All maintenance in one calendar.

Demo account, maintenance view.

PRICING FOR MAINTENANCE TEAMS

Start free. Pay only for add-ons.

All your machines in one account, for as many users as you like, at no cost. You only pay for what you add.

Machine Fleet Maintenance

Service Requests & Shop

We bring your manufacturers on board

As many users as you like

WHAT YOU CAN ADD

Service Brain
$5.00 per machine per month

Visibility (IoT)
from $24.00 per machine with live data, per month

Parts Inventory
$399.00 first location, per month

QUESTIONS

What maintenance teams ask us first.

We already have a maintenance system. Why Transaction-Network?

Your system knows your work orders. It doesn't know your manufacturers' documents, parts and prices, and the manufacturer isn't part of the process. Your system stays: the Service Brain draws on its maintenance and fault history as an additional source.

What if my manufacturer isn't on board yet?

Tell us and we invite them. Until then, you add the machine yourself, with your own documents.

Who owns the data?

You do. Data and knowledge created in your account belong to you. Your Service Brain works only with your data, for your machines, in your account.

How secure is it?

We work in line with ISO/IEC 27001, the SOC 2 criteria and NIS-2. Operated in Frankfurt, Germany. You'll find contracts and documents in the Trust Center.

DEMO

See your machines in one account.

In a demo we show you what your machine park looks like in one account: every manufacturer, every machine with its record, maintenance and the Service Brain.
